Samsara - Agvance SKY Dispatch

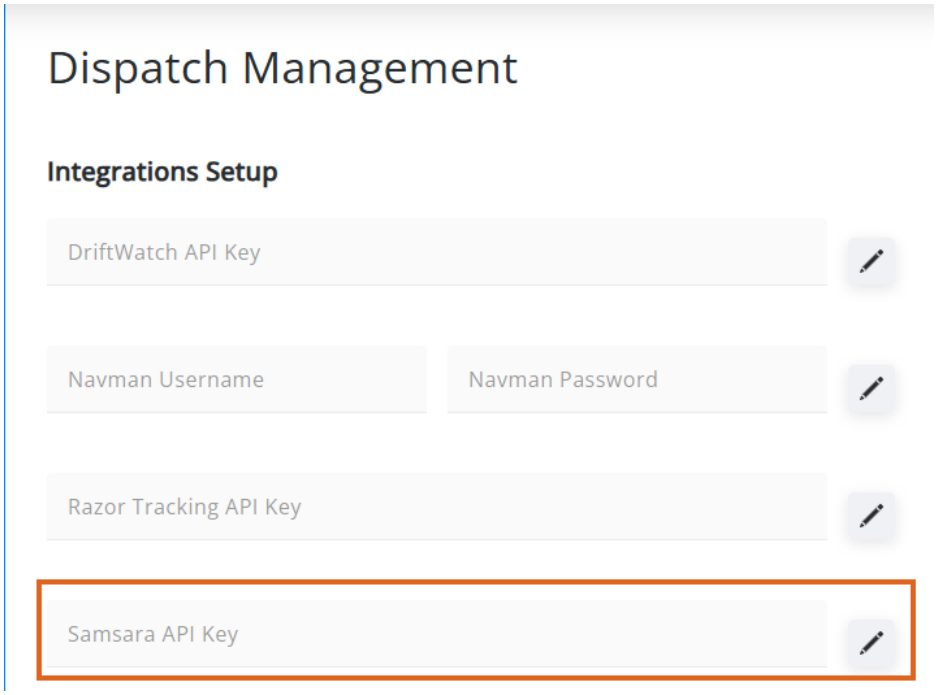

Last Modified on 07/07/2026 9:20 am CDT

The Samsara Integration gives the ability to view real-time location data directly on Agvance SKY Dispatch and Agvance Ops maps. By bridging third-party tracking with Agvance, this integration ensures dispatchers can monitor fleet movement and job status in a unified interface.

Setup in Agvance SKY Admin

An administrator must first enable the integration by entering the required API credentials.

1. Navigate to *Agvance SKY Admin / Dispatch*.

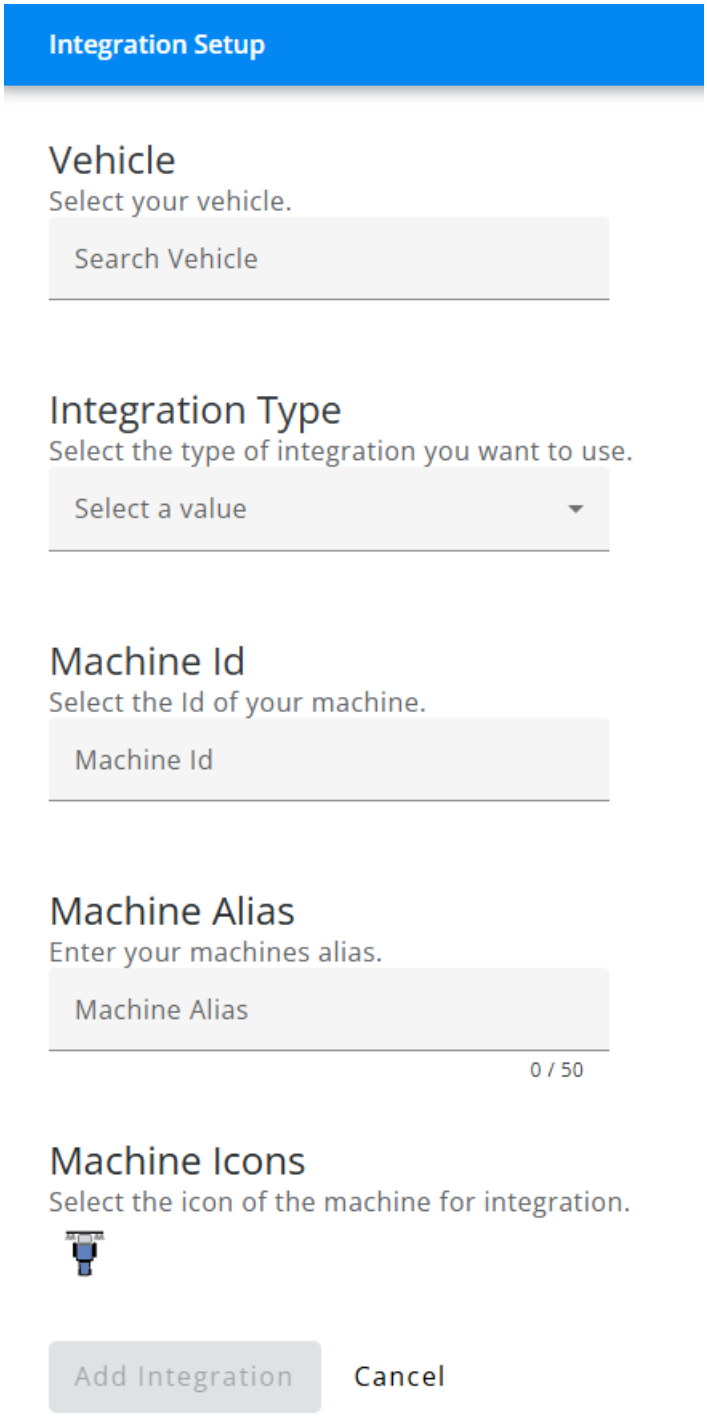

2. In the *Integrations Setup* section, enter the *Samsara API Key*.
3. Select the **Edit** icon to save the key.
4. Once the key is validated, it will save.

Note: The *Samsara API Key* can be removed after validation by selecting the **Delete** icon.

Setup in Agvance SKY Dispatch

1. Navigate to *Agvance SKY Dispatch / Company Settings / Integrations*.
2. Select **+ Add Integration.**
3. Complete the setup fields:
    - **Vehicle** – Select the Vehicle to link.

- **Integration Type** – Select Samsara.
- **Machine ID** – Select the unique identifier of the Samsara asset.
- **Machine Alias** – This defaults as *Machine ID* but can be edited.
- **Map Icon** – Choose a visual icon to represent the asset.

4. Choose **Add Integration** to complete connection.
