

Dispatching Tender Drivers - SKY Dispatch

Last Modified on 12/15/2025 11:35 am CST

SKY Dispatch companies can schedule tender drivers either alongside the applicator assignment or independently. In addition, a dedicated Tender Driver view is now available in Agvance Ops, providing tender drivers with access to job and product information organized for tender workflow requirements.

Company Settings

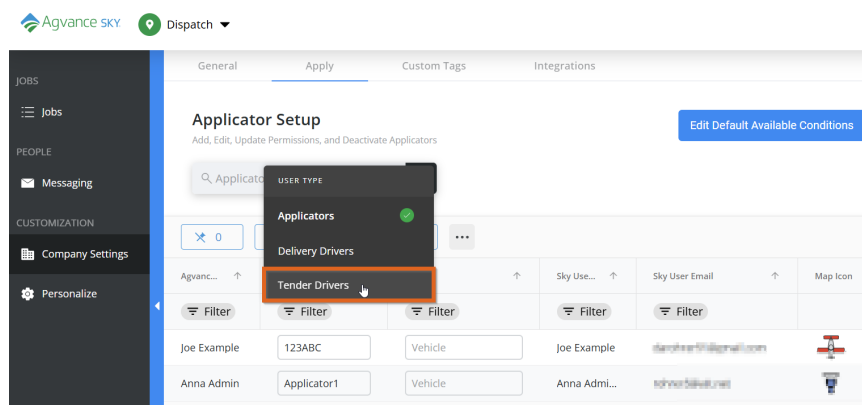

Within *Company Settings*, the configuration for tender related roles is found under the *Apply* tab.

Within *Applicator Setup*, select the **Ellipsis** menu to access the *User Type* options.

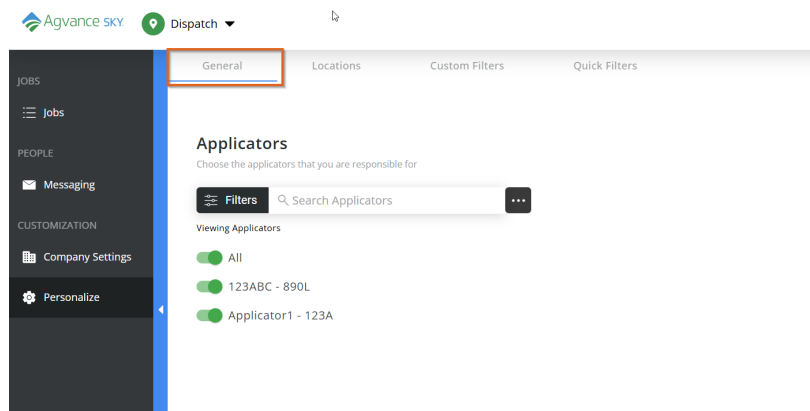

The available types now include:

- Applicators
- Delivery Drivers
- Tender Drivers

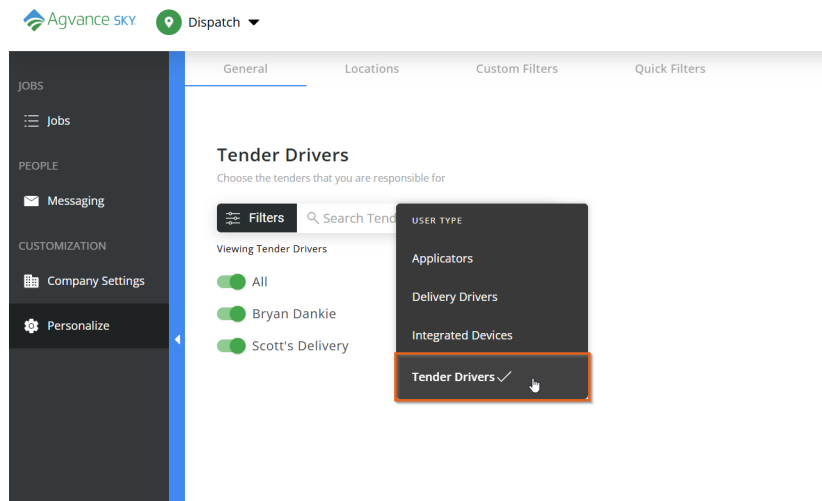

Personalize

Tender Driver visibility and related settings are located within the *General* tab of *Personalize*.

Within the *Applicators* field, select the **Ellipsis** to open the *User Type* list.

Available types include:

- Applicators
- Delivery Drivers
- Integrated Devices
- Tender Drivers

Tender drivers must be enabled here to appear in assignment selections.

Toolbar Assignments

The toolbar allows for assignments to individual jobs or several jobs at once. When assigning to multiple jobs, all selected assignments, including the *Primary assignee* and *Tender Drivers*, are applied to each job unless an override message is displayed.

The screenshot shows the 'Blend Jobs' interface. On the left is a sidebar with navigation options: JOBS, PEOPLE, CUSTOMIZATION, and Personalize. The main area displays a table of jobs with columns for Ticket N..., Customer, VRT, Crop, and Crop Ch... The table lists several jobs, with job 205 selected. On the right, an assignment panel shows options for Primary assignee, Secondary assignees, and Tender Drivers, along with a button to Assign Selected Jobs and a section for Product Totals.

Ticket N...	Customer	VRT	Crop	Crop Ch...
203	Anderson, ...	X	--	--
205	Anderson, ...	X	--	--
220	Wheeler, G...	X	Soybeans	Roundup T...
221	Wheeler, G...	X	Soybeans	Roundup T...
222	Wheeler, G...	X	Soybeans	Roundup T...
224	Zuzzle, Sa...	X	Corn	--
225	Zuzzle, Sa...	X	Corn	--

Items per page: 50

45 jobs match your filter criteria | 1 jobs with 66.2 acres are selected

Primary assignee: Select an applicator

Secondary assignees: Select applicators

Tender Drivers: Select tender drivers

Assign Selected Jobs

Save Product Totals as PDF

Product Totals

Dap (18-46-00)	11,730.000 Lbs
Potash (0-0-60)	6,747.000 Lbs
Ammonium Sulfate	22,074.000 Lbs

If a job already has an applicator assigned, then the following message will appear. Selecting **Assign Selected Jobs** will override any previous assignments.

The message box has a dark background with orange text stating: "These jobs already have an applicator assigned - this will override the previous assignments." Below the text is a large blue button labeled "Assign Selected Jobs".

Primary Assignee

When one or more jobs are selected, the assignment panel prompts for a *Primary assignee*.

A primary applicator must be selected before tender assignment becomes available.

This screenshot is identical to the one above, showing the 'Blend Jobs' interface with the assignment panel on the right. The 'Primary assignee' field is highlighted, indicating where a primary applicator must be selected before tender assignment becomes available.

Tender Drivers

Once the Primary assignee is chosen, the *Select tender drivers* option is available. Selecting this opens a list of Tender Drivers configured for the SKY Dispatch company.

Tender driver assignment depends on the following configuration:

- Tender Drivers are set up on the Apply tab under Company Setting.T
- Tender Drivers are enabled on the General tab under Personalize.

Note: A SKY account cannot be assigned as both an Applicator and a Tender Driver on the same job.

Schedules

Selecting **Schedules** in SKY Dispatch shows jobs by Applicator with the ability to reorder and reassign jobs.

Use the *Viewing* menu to switch between Blend and Delivery Tickets. Filter Applicators by using the *Filter Applicators* field. Optionally select the *Condense Job Details* toggle to view less or more job information.
