Dispatch

- **SKYC-3838 / Default Primary Applicator in Toolbar** – Primary Applicator assignment behavior has been updated when working with Blend Jobs in *List view* and *Map view* to improve efficiency and preserve manual selections.

- **SKYC-3840 / Area In Delivery Job List View** – *Area* column has been added to the *Delivery Job List* grid for Delivery Tickets. This column displays the *Quantity* and *UOM* from the Delivery Ticket, supporting operations that use *Acres* for product totals and size measurements.
