Dispatch

- **SKYC-3783 / Date Range Selection in Quick Filters** – *Quick Filters* now support relative date ranges, allowing filters to remain relevant without frequent updates.
    - **Why** – This change enables users to specify relative date ranges for their *Quick Filters*, which improves functionality.
    - **When/Where** – Within *SKY Dispatch / Personalize / Quick Filters*, users can now select *Today*, *Tomorrow*, or a selected number of days.
    - **Action Needed** – Update *Quick Filters* as needed to filter by *Ordered*, *Requested*, or *Completed* date ranges.
- **SKYC- 3715/ Job Data Labels Info** – Job data labels for Blend Tickets can now display both *Job* and *Field* information at the same time.
    - **Why** – This change allows Job and Field information to be displayed together within Job Data Labels, providing clearer visibility on the **Map View**.
    - **When/Where** – Within **Map view**, *Job Info* and *Field Info* can both be enabled at the same time.
    - **Action Needed** – No action is required.
