

API 7.0.30950 | 08.04.2026

Last Modified on 09/08/2026 1:55 pm CDT

- **FTM-5139 / GetVendor Filters** – The API GetVendor endpoint now allows filtering by a single Classification.
- **FTM-5140 / GETBlendTicketData Pagination** – The public and private endpoints to GET the list of Blend Tickets have had pagination enforced at a maximum of 100 records per request.
- **FTM-5184 / BlendTicket/GetBlendTicketData Filters** – An Automated Blender API Partner property was added in Agvance Windows on Blend Product Sets. the GET/PATCHPUT/POST API methods for BlendProductSet now include this property. A filter was also added for a Product Set description and for an Automated Blender API Partner for the BlendTicket/GetBlendTicketData endpoint.
- **FTM-5186 / POSTInvoice/GETInvoiceList** – The API POST Invoice/GETInvoicesList is able to filter by the *priceby* field.
