

Send Rec to Agvance Windows - Agvance SKY Mapping

Last Modified on 08/07/2026 4:00 pm CDT

Create either an equation or manual Rec in Agvance SKY Mapping and send it straight to a Plan rather than having to import the Recommendation. This saves time and provides an efficient workflow.

More information on the setup for this process can be found [here](#).

Send Rec to Plan

This is based on Equation or Manual Recommendations for Fields or for Zones within Fields.

Note: The *Send Rec To* User Role must be assigned in Agvance SKY Mapping to enable this functionality.

1. With a Field selected, navigate to the *Rx* tab, then select the **Ellipsis** to the right of the Recommendation.

Choose *Send Rec To*, then *Agvance Plan*.

Note: Currently, only one Rec can be sent at a time.

2. Settings here are pertinent to Agvance.

- **Location** – The Location selection determines which Product Sets are available in the *Product Sets* drop-down.
- **Pricing** – Choose from *Not Quoted*, *Quoted*, or *Price Offered*.
 - **Quoted** – Pulls in the price on the Plan.
- **Agvance Crop** – The Crops listed here come from the [Crop Maintenance setup](#) in the Hub at *Setup / Crop Maintenance*.

- **Agvance Crop Chemistry** – Choose an item and review the Plan.
3. The Products displayed below the drop-downs indicate the Products linked in Agvance.

Note: Products chosen not linked from Agvance Windows will display an empty Agvance Product in the *Send to Agvance Plan* window in Agvance SKY Mapping.

4. Upon selecting **Send**, a message displays indicating the status and name of the Plan (e.g., Sending Rec to Agvance...Plan Created: My Plan).

Note: Recs can only be sent to a Plan ONCE.

Review Plan

1. In Agvance Windows, edit the Field Plan.
2. Review all tabs.

- On the *General* tab, review the *Crop*, *Crop Chemistry*, and *Product Set*.
- On the *Products* tab, review the *Rate/Acre* and *Unit* for the Products and compare to those in Agvance SKY Mapping. The Product linking ensure rates and units are adjusted accordingly.
