# Order August 2026

Last Modified on 09/04/2026 8:47 am CDT

- **SKYD-1112 / Last Used Values** – Transactions remember last-used values in Agvance SKY Order.
  - **Why** – This gives the ability to efficiently add consecutive transactions without needing to choose those options each time.
  - **When/Where** – Some values are remembered when adding Blends, Plans, and Deliveries.
  - Action Needed – No action required.
- **SKYD-514 / Rate/Acre Calculator** – A Rate/Acre Calculator is now available when adding/editing Blends, Plans, and Templates in Agvance SKY Order.
  - **Why** – This gives the ability to calculate how much of a Product is needed based on the quantity of another Product or Product(s).
  - **When/Where** – The **Rate/Acre** Calculator is available on Blends, Plans, and Templates in the *Product* grid.
  - **Action Needed** – No action required.
