

B2B API Profiles - Supplier eLink

Last Modified on 10/22/2026 2:53 pm CDT

Winfield is utilizing OAuth2 to provide a greater security level. Customers will need to reach out to Winfield to access credentials.

SSI Support will NOT be included in retrieving/accessing credentials.

API Profiles are added in B2B at *Setup / API Profile* menu and are then selected under each process setup area.

- **Single Profile** – If Agvance Users will need access to all B2B functions, a single API Profile can be established.
- **Multiple Profiles** – If Agvance Users will need restricted from any B2B functions, multiple API Profiles should be used.

Single Profile

The left screenshot shows the 'Setup API Profile' dialog. It contains a table with the following data:

Profile Name	Inactive
Winfield API	☐

Buttons: Add, Edit, Delete, Cancel, Active (dropdown).

The right screenshot shows the 'API Profile' configuration dialog for 'Winfield API'. It includes the following fields:

- Name: Winfield API
- API URL: https://microservices.landolakes.com/v1.1/winfieldunited/ordermanagement
- Auth. URL: https://apisso.landolakes.com/as/token.oauth2

Below these fields is a table for user credentials:

	User Name	<User ID>	Client ID	Client Secret
1	Ellis, Robert	1RE	xxxxxx...	*****
2	Rogers,...	MR	xxxxxx...	*****
3	Witter, De...	DW	xxxxxx...	*****

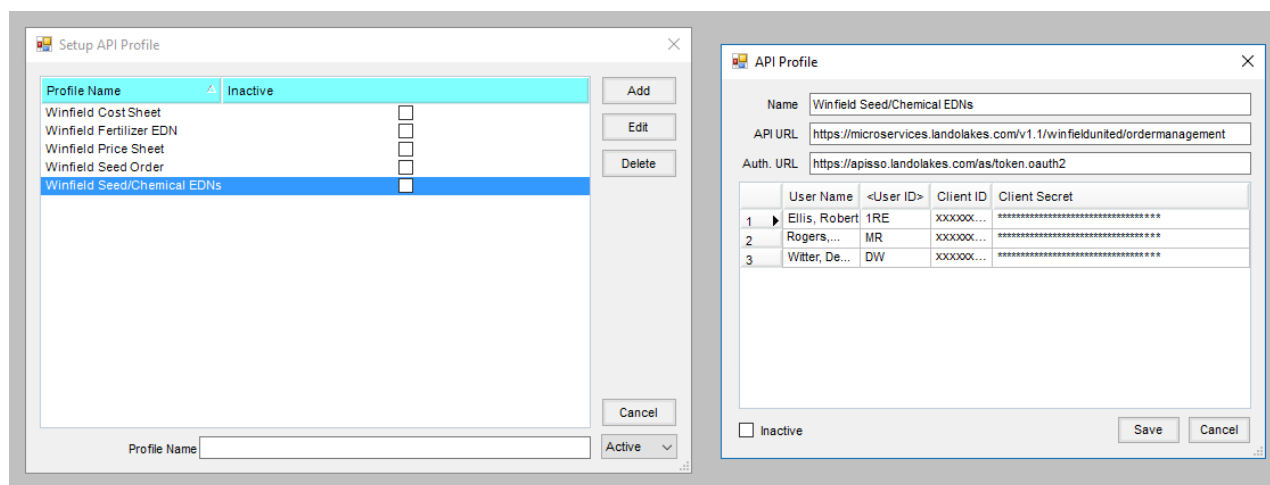

Buttons: Inactive (checkbox), Save, Cancel.

Enter the following:

- **Name** – Specify the Vendor (ex. Winfield API).
- **API URL** – https://microservices.landolakes.com/v1.1/winfieldunited/ordermanagement
- **Auth. URL** – https://apisso.landolakes.com/as/token.oauth2

For each Agvance User, add credentials for the *Client ID* and *Client Secret* (provided by Winfield), then choose **Save**.

Multiple Profiles

Enter the following for applicable processes:

- **Name** – Specify the Vendor/process (ex. Winfield Seed Order, Winfield Seed Orders, Winfield EDN, Winfield Price Sheet, Winfield Purchase Order).
- **API URL** – https://microservices.landolakes.com/v1.1/winfieldunited/ordermanagement
- **Auth. URL** – https://apisso.landolakes.com/as/token.oauth2

For each Agvance User, add credentials for the *Client ID* and *Client Secret* (provided by Winfield), then choose **Save**.
